

Tutorial choices form

Please read these guidance notes carefully, then list the tutorials you wish to take on page 2 of this form. If necessary, please seek approval from your academic advisor before returning this form. As far as possible, we like visiting students to follow the same courses as our home undergraduates, this means that for some subjects there will be small classes rather than tutorials available. Please contact us if you need to know the content of specific courses, e.g. for transfer of credit. The LMH website has information on the available courses to help you complete the tutorial requests section; please go to <http://www.lmh.ox.ac.uk/prospective-students/visiting-students/how-apply> and scroll down to "Subjects". You can select tutorials from a maximum of 3 subject areas; however, in order to achieve the greatest benefit from the Oxford tutorial system, we recommend that you select tutorials from only one or two subject areas. The majority of our home students will be taking one subject, with a few taking two or rarely three. Given the depth of study at Oxford, even those students taking course such as Philosophy, Politics & Economics will only study two of these beyond the first year. The courses offered are typically those which will be studied by our home students who have completed the first year of study in that subject. Please ensure that you have the pre-requisite background knowledge for the courses you wish to pursue, and ask us if you are not clear about this. Please note that if you are accepted for a programme of study, it may be possible to make minor variations, but you would be unlikely to be able to make a complete change of programme.

Most visiting students take 1 major (8 tutorials) and 1 minor (4 tutorials) per term. Please select a minimum of 3 major, and 3 minor choices, listed in order of preference. Students on the extended Michaelmas term will normally take two majors, with one starting in September and one starting in October. If a course is only available in one term, we will allocate your courses to the correct term in which they are available. Some important points:

- Please indicate, by ticking the relevant boxes, whether you wish to take each course as a major or minor option; if you would be happy either way, please tick both boxes. If the course you have selected is in either of Computer Science, Economics or Physics, you should only tick the CS/Econ./Phys. Box (see below for further information).
- Applicants should be aware that the courses offered in Computer Science, Economics and Physics are shorter courses of approximately 4 tutorial hours, therefore, if you wish to take options solely in these subject areas, you should be aware that you will be taking 3 minor courses, rather than a major and a minor option. You will need to select a minimum of 3 courses per term to have a full programme of study, so a full-year candidate should list at least 9 course.
- It is possible to mix other disciplines with Computer Science, Economics or Physics. For example, you may wish to study courses in Physics and Mathematics, or Economics and Politics. In these cases, you should indicate whether you wish the subject from the other discipline to be a major or a minor option.
- It is NOT possible to start courses in Biological Sciences, Computer Science, Economics, Mathematics, or Physics in September. Candidates for the Extended Michaelmas term should include at least one option from other subject areas on their list.
